

Cleft Collective Speech and Language Study Monthly Update!

Issue 3, November 2016

Number of participants recruited in October 2016

Estimated percentage of eligible participants recruited at each site to end of October

Request for Information

Each site undertakes recruitment to the speech study in a way that fits best with the service. Please could you let us know things that work well for you and challenges that you have encountered?

Sam.Harding@speech-therapy.org.uk

Some site differences:

Absolute numbers of recruitment figures only tell part of the story.

Over the last 3 updates we have reported the number of children recruited at each of the sites. However, we wanted to note there is a great variation in the cleft population across services. Also that some services overlap their with one site undertaking the surgical intervention, but another recruiting for the speech study.

Another factor

Each site varies in the amount of staff time it is able to dedicate to recruitment.

Dr Yvonne Wren

“Thank you for all your continued hard work and support”
