

## PrecisionPoint Transperineal Access System

Bristol Urological Institute, Southmead Hospital, BS10 5NB

**Date:** TBC    **Course Fee:** £300 per delegate

### Course programme

This highly practical course provides training and understanding on the use of the PrecisionPoint Transperineal Access System for free hand transperineal biopsies in prostate cancer diagnostics. The course is run by Professor Raj Persad and Mr Stefanos Bolomytis at the Bristol Urological Institute on 11<sup>th</sup> January 2020.

### Who should attend?

Aimed at Urologists, Oncologists, Radiologists, Trainees and Advanced Nurse Practitioners in Urology involved in the diagnosis and treatment of prostate cancer. For those who are interested in changing the paradigm of outpatient prostate cancer diagnostics for transrectal prostate biopsies to transperineal biopsies.

### Overall objectives

The workshop aims to teach the principles of freehand local anaesthetic transperineal targeted and systematic prostate biopsies. The workshop will explain how Precision Point can be used to enhance the prostate diagnostics, particularly in relation to the two-week wait pathway and to outline the use of MRI / ultrasound fusion.

**BXTAccelyon Ltd** are delighted to be working as the exclusive distribution partner for PrecisionPoint™, focused on bringing this technology to our global customer base of oncology cancer clinics.

The workshop will combine live cases with presentations, examples of good practice, Q&A sessions and guidance throughout.
