

RETT UK Training for Speech & Language Therapists, 22nd March 2018

Medical or healthcare professional?

Rett Syndrome is a neurological disorder that disproportionately affects females and results in physical and communication disabilities. Rett UK, a charity dedicated to supporting people with Rett Syndrome and their families, will be presenting a full day of training for Speech and Language Therapists at Southmead Hospital on the 22nd of March 2018. The morning session will be an overview of Rett Syndrome and the afternoon will focus on communication and AAC.

Presenter:

Julie Benson, Family Support Worker,
Rett UK

Tickets: £30PP
