Patient pathway:

1. Early diagnosis
2. Signs and symptoms
3. GP
4. Referral
5. Imaging
6. Consultation
7. Biopsy or resection
8. Pre-operative clinic
9. Surgery
10. Diagnosis
11. Further treatments e.g. radiotherapy and chemotherapy
12. Ongoing and follow-up care
13. If the tumour appears to be coming back

Tissue bank:

1. Patient asks about tissue donation
2. Patient gives consent
3. Tissue collected
4. Pathological analysis, tissue handed to bank
5. Patient can approach the tissue bank anytime to give consent after surgery

Opportunities for collection:

- Clinical trial
- More radiation
- Palliative care
- More surgery
- Experimental therapy
- Pre-operative clinic
- Surgery
- Diagnosis
