

Empower patients as partners in high quality research

- NBT's patients developed a Patient and Public Involvement Toolkit for a European wide project to develop new antibiotics. The first of its kind in Europe.
- Research patient information video trialled which has received positive feedback from our research participants.
- Maternity have refreshed the photographs used in their research materials to reflect their unique demographic.

Support and nurture a sustainable workforce

- Supported pharmacy to develop a different staffing structure to build resilience for the future.
- **Supported 31 members of staff** to present at regional and national conferences.
- Helping staff who have completed MSc's to write articles from their thesis to build their research portfolio.
- **Provided £170,536** to provide dedicated research time for our staff to develop research ideas.

Delivering against the Research Strategy

2017 - 2022

Year 2 Priorities

Broaden our research portfolio to offer more of our patients and staff the opportunity to participate in research.

Increase research led by nurses, midwives and Allied Health Professionals.

Improve the way we manage our workforce by creating a people strategy and investing in tools to aid monitoring, decision making and oversight of training and competence.

Increase patient satisfaction with our research portfolio and activities.

Broaden

- Awarded 11 new NIHR grants **worth £6.6 million**, across 8 clinical specialties.

5834

patients took part in research **34%** increase on last year.

We opened **112** new research studies.

Delivered ground-breaking early phase trial in maternity for assisted birth.

Increase

Friends and Family test shows that **100%** of people are extremely likely to recommend our service.

- **NBT in the top 10 of trusts in England** who have reported an increase in the number of NIHR research studies this year.
 - 14.1%** increase in the number of studies recruiting.
 - 40.4%** increase in the number of participants who took part in research.

Held **44** sessions

for patients to help design & prioritise research.

Improved

Launch of Research & Innovation People Strategy.

Re-launch of improved Research & Leadership Competencies.

- Supported Divisions to include research in their annual business plans.

Electronic holiday tracker launched.

Achieved Investors in People 'Silver' accreditation for the way we develop and manage our people.

Our success rate for research grant awards continues to be higher than the national average.
