

Árvore de tomada de decisão para casos de crianças com Perturbação dos Sons da Fala (PSF)

A criança apresenta um discurso com inteligibilidade reduzida. Família/docentes preocupados; sem condições médicas associadas (e.g., Paralisia Cerebral; Fenda Labiopalatina).

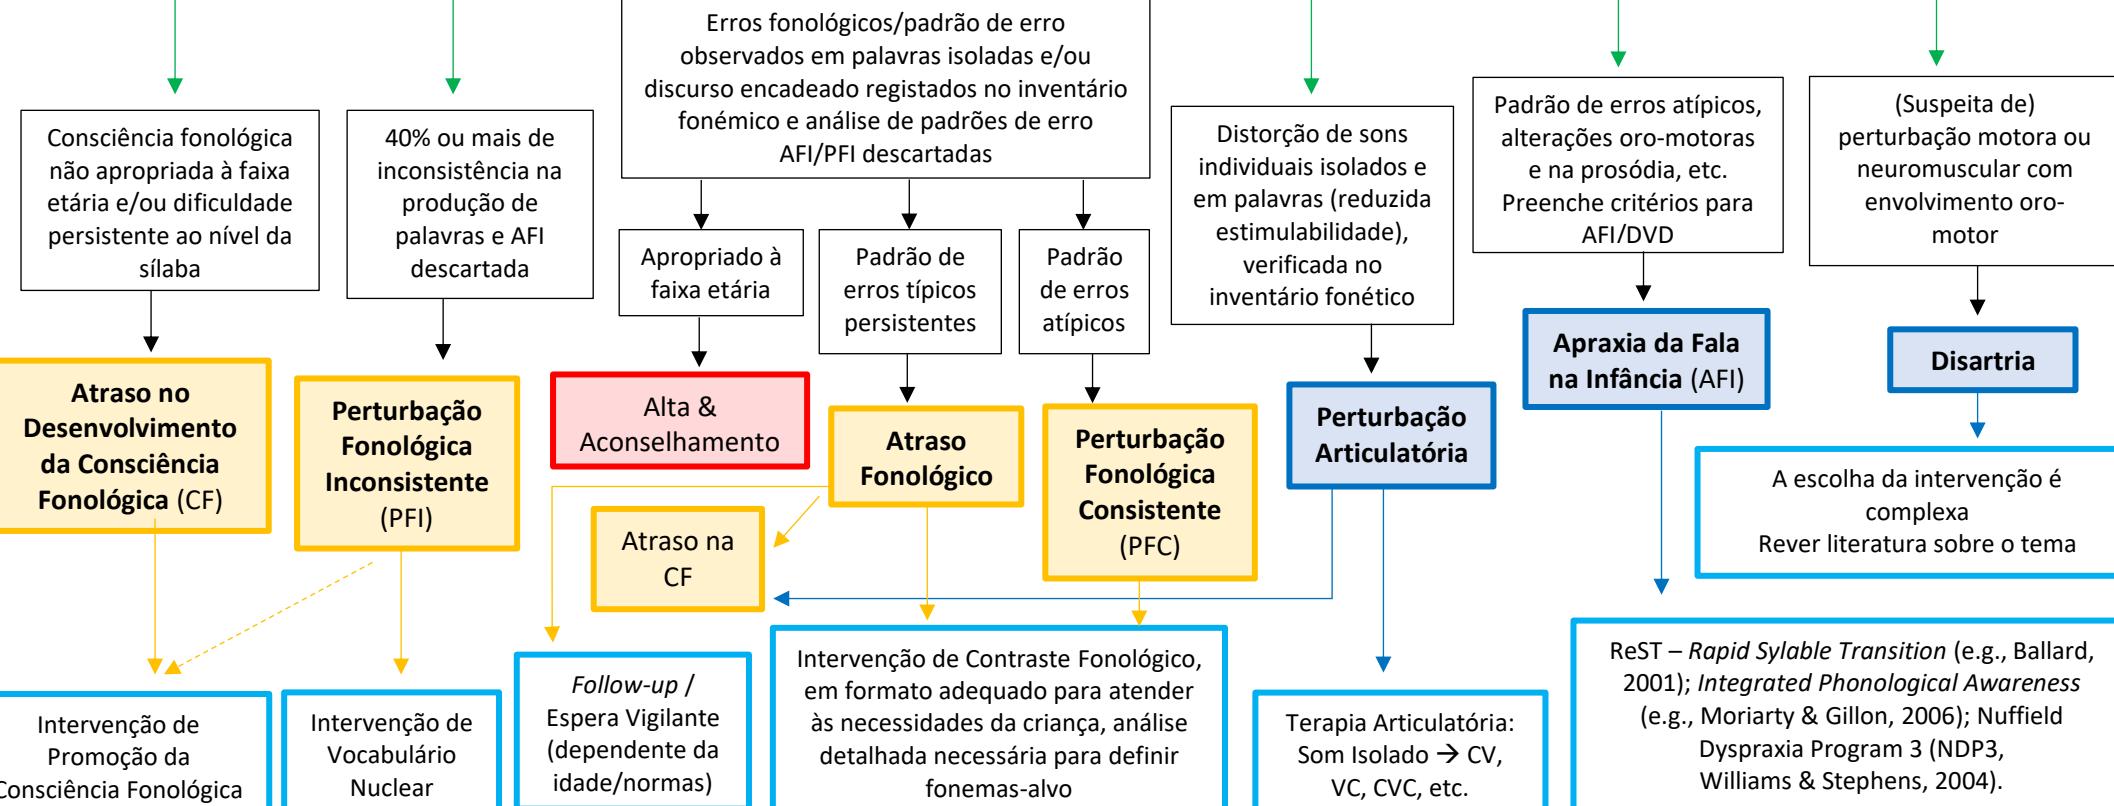

Diagnósticos que podem coexistir:

Atraso no desenvolvimento da consciência fonológica **E/OU** Perturbação articulatória **E** Atraso fonológico **OU** Perturbação fonológica consistente **OU** Perturbação fonológica inconsistente. Em casos raros: Disartria **E** AFI e.g., Síndrome de Worster-Drought

Avaliação: palavras isoladas; discurso encadeado; avaliação do sistema estomatognático; articulação/estimulabilidade; inventário fonético e fonológico; processos fonológicos; consciência fonológica (ao nível da sílaba e do fonema); inconsistência (múltiplas produções da mesma palavra).

Termo diagnóstico mais abrangente: **Perturbação dos Sons da Fala**

PSF de origem desconhecida

Árvore de tomada de decisão para casos de crianças com Perturbação dos Sons da Fala (PSF)

*Apraxia da Fala na Infância (AFI) é frequentemente referida como Dispraxia verbal de desenvolvimento (DVD), nomeadamente no Reino Unido e em Portugal. AFI é o termo mais coCAS is the most common term globally.

Reconhecimento: A Dr^a Lindsay Pennington e Dr^a Jan Broomfield por recomendações específicas nas suas áreas de especialidade. Aos membros da *Child Speech Disorder Research Network* por comentários e sugestões.
