

# Cleft Collective Speech and Language Study Monthly Update!

Issue 43 August 2022

Thank you to everyone who continues to support the cleft collective study and especially the speech sub-study!  
Welcome to all the new team members and welcome back to those of you who have left and returned.

**Welcome to  
Dominika  
Kruszynska!**

*Fay retired earlier this year and the team have welcomed Dominika. She will be working with Sam to answer questions and provide paperwork specifically relevant to the speech study.*

Above is a chart showing the absolute numbers of children recruited to the speech study as of the end of May 2022, right from the start of the project in 2016. We know different sites started recruiting at different times and that you all have

different size potential cohorts and varying research nurse time for recruitment. But we just wanted to show you all the numbers as a catch-up.

You may also be aware that the main study and therefore this sub-study has secured funding to continue the project.

We are therefore in the process of putting this project extension through ethics, and taking the opportunity to tweak a few of the study documents. We will be in touch in the next few months with more detail about these changes.

*As always please do get in touch with us if you need any resources, or if you have any questions.*
