

Cleft Collective Speech and Language Study Monthly Update!

Issue 40, June 2021

With most sites now recruiting to the speech study we thought it was time to restart our monthly update!

If you have yet to 'restart' and need help with any of your trust processes, or have any questions do get in touch with us (Samantha.harding@nbt.nhs.uk).

Study Amendment:

Previously the maximum age of recruitment was set at 13 months. We have increased this to **36 months**.

We are still keen to recruit children under 13 months to get a full dataset but when that is not been possible, children will not be asked to participate in the audio recordings (LENA), because this is an age time sensitive data point. However all other data entry will still be relevant to building the resource and using the data.

This amendment allows for speech and language therapy data to be collected from children who were not able to be recruited due to COVID-19 or other clinical exceptions/limitations.

As always please do get in touch with us if you need any resources, or if you have any questions. Samantha.Harding@NBT.nhs.uk 0117 4143957
