

Antimicrobial Reference Laboratory Bristol

The National Pathology Exchange (NPEx) is a national service for NHS pathology managers to connect all UK labs together through a single exchange hub so that test requests and pathology results are sent digitally from any lab to any lab in a matter of seconds.

How it Works

The Process

We have now gone live on NPEx for the following assays:

Teicoplanin, Fluconazole, Flucytosine, Itraconazole, Isavuconazole, Posaconazole and Voriconazole

For full details about our services and range of analytes please visit:
